Dear Sir / Madam

RE: ZENVIRON SECURES SECOND MOORABOOL WIND FARM CONTRACT

Please find attached a copy of a media release issued today by Zenviron Pty Ltd ("Zenviron"), an incorporated joint venture in which Monadelphous Group Limited (ASX:MND) is a shareholder.

Zenviron is a full-service balance-of-plant contractor providing engineering, procurement and construction services to the renewable energy sector in Australia and New Zealand.

Zenviron has been awarded a contract to deliver the southern section balance-of-plant works for Goldwind Australia's Moorabool Wind Farm in regional Victoria, which is in addition to the contract for the northern section of Moorabool Wind Farm announced on 24 April 2018, taking Zenviron's total contract works on this project to approximately \$130 million.

For further information, please refer to the attached media release.

Media Release

4 October 2018

Zenviron secures second Moorabool Wind Farm contract

Full-service balance-of-plant specialist, Zenviron, will deliver both the northern and southern sections of the Moorabool Wind Farm in regional Victoria following the award of a second contract, taking Zenviron's total contract works on this project to approximately \$130 million.

Goldwind Australia, owner of the Moorabool Wind Farm, awarded the northern section balance-of-plant works to Zenviron in April this year, and has now awarded further balance-of-plant works for the southern section of the wind farm to Zenviron.

Speaking on the additional contract award, Zenviron General Manager Carl Keating said the second package of work with Goldwind Australia demonstrates confidence in Zenviron's capability to deliver on this vital renewable infrastructure project for Victoria's sustainable energy future.

"Building trusted relationships with our customers while delivering sustainable energy solutions for Australia is something we pride ourselves on, so it's with great pleasure that we take on a second contract with Goldwind Australia for the delivery of balance-of-plant works across the entire project," said Mr Keating.

This is Zenviron's fourth wind farm project win for 2018.

Goldwind Australia Vice President – Program Delivery, John Gardner said Goldwind was pleased to be continuing its partnership with Zenviron for the Moorabool Wind Farm project.

"We look forward to continuing to work with Zenviron during the construction phase of the project," said Mr Gardner.

Construction of the northern section of the Moorabool Wind Farm is in-progress and is expected to be fully operational by mid-2019. Balance-of-plant works will commence on the southern section of the wind farm from September 2018, with completion expected in early 2020.

Goldwind anticipates up to 300 jobs onsite during construction peaks for the project, and to employ up to 20 permanent maintenance staff once the wind farm is operational.

Once operational, the wind farm will power approximately 200,000 Victorian homes each year.

ENDS

Zenviron

Zenviron is a full-service balance-of-plant contractor, bringing together the combined strengths of Monadelphous and ZEM Energy to provide multidisciplinary engineering, procurement and construction capabilities for large-scale renewable energy projects in Australia and New Zealand.
